On the 6th July, a UK Government agency, known as the Office for National Statistics (ONS), published data on deaths by vaccination status in England up to 31st May 2022.

The latest dataset from the ONS is titled '*Deaths by Vaccination Status, England, 1 January 2021 to 31 May 2022*', and it can be accessed on the ONS site **here**, and downloaded **here**.

All data relating to 'Age-standardised mortality rates for deaths by vaccination status, England: deaths occurring between 1 January 2021 and 31 May 2022: 6 July 2022'

Age-standardised mortality rates for deaths by vaccination status, England: deaths occurring between 1 January 2021 and 31 May 2022

Publication date: 6 July 2022

Table 1 of the latest dataset contains figures on the mortality rates by vaccination status for all-cause deaths, deaths involving Covid-19, and deaths not involving Covid-19. And it is here that we are able to ascertain the vaccination status of everyone who has died of Covid-19 since the beginning of 2022.

Here's how the ONS presents the figures for the month of January 2022 –

Cause of Death	Year	Month	Vaccination status	Count of deaths
Deaths involving COVID-19	2022	January	Unvaccinated	693
Deaths involving COVID-19	2022	January	First dose, less than 21 days ago	9
Deaths involving COVID-19	2022	January	First dose, at least 21 days ago	117
Deaths involving COVID-19	2022	January	Second dose, less than 21 days ago	6
Deaths involving COVID-19	2022	January	Second dose, between 21 days and 6 months ago	75
Deaths involving COVID-19	2022	January	Second dose, at least 6 months ago	1098
Deaths involving COVID-19	2022	January	Third dose or booster, less than 21 days ago	90
Deaths involving COVID-19	2022	January	Third dose or booster, at least 21 days ago	2519
Deaths involving COVID-19	2022	January	Ever vaccinated	3914

We've taken the figures provided by the ONS for an entire year, and have produced the following chart showing Covid-19 deaths per month by vaccination status in England between 1st June 2021 and 31st May 2022 –

Click to enlarge

January 2022 saw the most deaths among the vaccinated population and unvaccinated population with 3,914 deaths among the vaccinated and just 693 deaths among the unvaccinated. Whereas June 2021 saw the lowest number of deaths among the vaccinated population with 224 deaths.

However, the lowest number of deaths among the unvaccinated population occurred in May 2022, with 82 deaths. For context, the vaccinated population recorded 1,282 deaths during the same month. This means the vaccinated accounted for 94% of all Covid-19 deaths during the most recent month.
